**CETAF role and national nodes**

Marko Lovric

CETAF

# Current Role of CETAF in DiSSCo

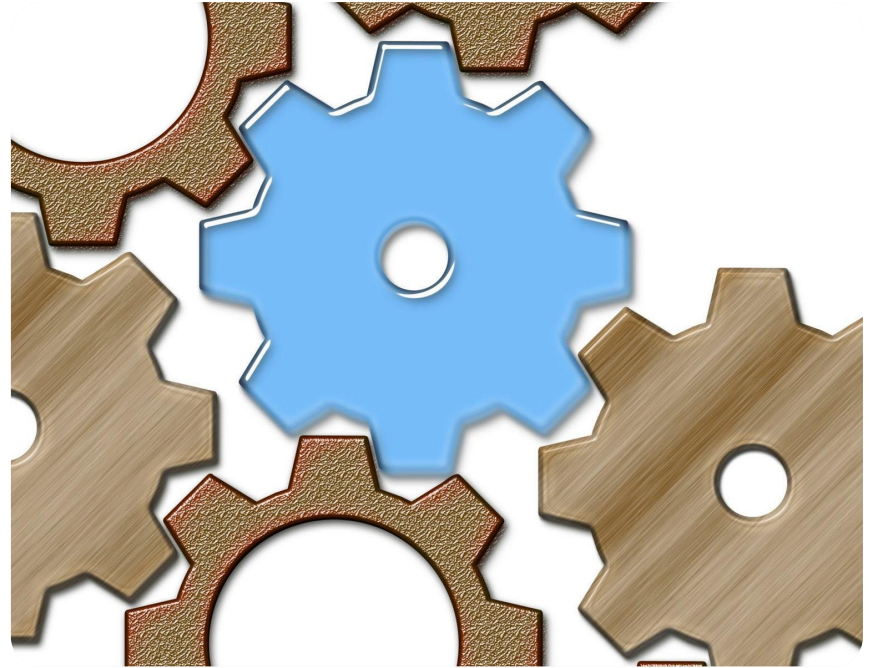

# Supporting the Development of DiSSCo through CSO

Examples of CETAF activities:

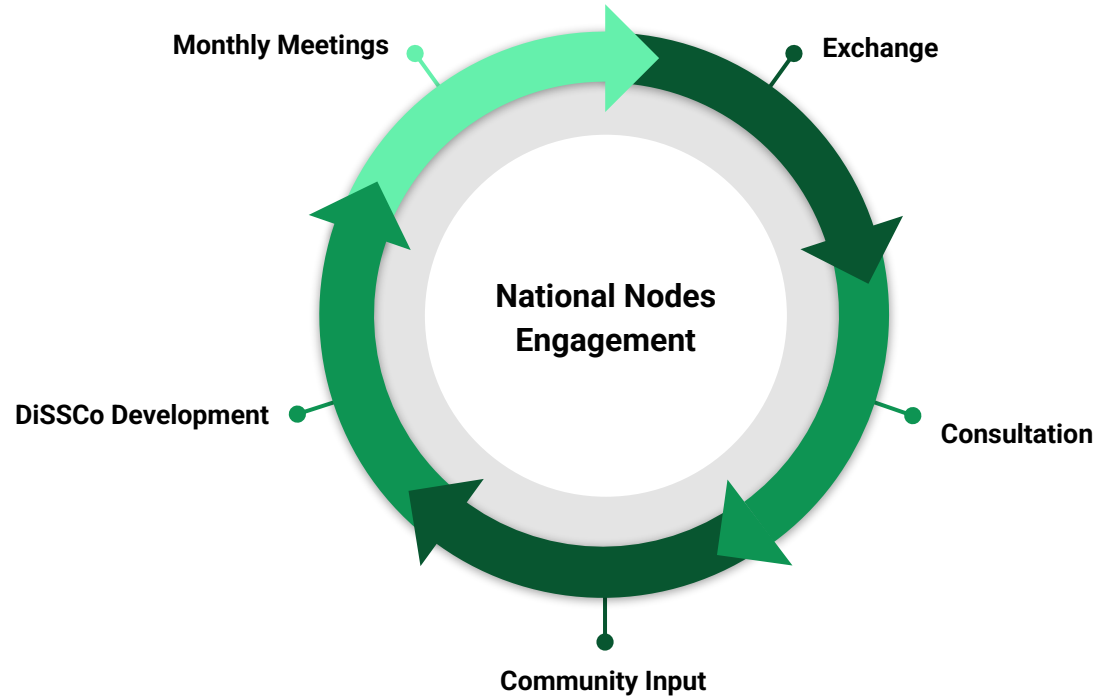

- coordination and administration
- governance support
- stakeholder engagement
- communication and dissemination
- coordination of the National Nodes Forum

# Coordinating the National Nodes engagement

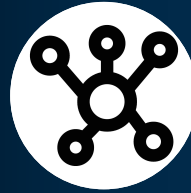

sharing experiences  
discussing developments  
gathering community  
feedback  
supporting common  
activities

# National Nodes - DiSSCo Community Backbone

National Nodes have several key roles in the DiSSCo process:

Connect national communities to DiSSCo

Facilitate information exchange

Help shape priorities and future developments

# Current priorities for National Nodes

01

ERIC transition

- keeping the community informed and connected during the establishment phase

02

Community consultation

- annotation frameworks
- future services
- operational processes

03

Registry and institutional information

- Supporting collection and institutional visibility through the CETAF Registry and DiSSCo Specialisation Tool

# Looking ahead

Future efforts will focus on:

- strengthening participation across Nodes
- sharing best practices
- facilitating collaboration between countries
- supporting community contributions to DiSSCo services and operations

# How Institutions Can Engage

Institutions can contribute through:

- National Node meetings
- community consultations
- technical and service development
- registry and collection information initiatives
